

ONE RECEIVER. FITS ALL...

OUR "YES-IT-CAN"-RECEIVER

Yes, our new EK 6042 two-channel slot-in receiver can connect to virtually every Sennheiser wireless system – be it analogue or digital (including G3, series 2000, 3000, 5000 and digital 9000). Yes, you can manage the complete setup with any browser and the built-in web interface; exports and imports of whole configurations included. Yes, its large display is easier to access and – without cryptic abbreviations – easier to use. Yes, it saves you time, because it auto-configures to any transmitter via IR. Yes, it has a huge bandwidth of 184 MHz and many, many output options.

Oh. And of course it is SuperSlot™-compatible and works seamlessly with your beloved SOUNDDEVICES-equipment. Same goes for ARRI, Panasonic and Sony. And yes, the EK 6042 works stand-alone as well. Did we mention its light-weight design?
